

Learn a language faster than ever

What is Lingvist?

Lingvist is a language learning app that accelerates the language learning process using elements of machine learning. Lingvist's primary objective is to get people speaking a language as quickly as possible, starting with the vocabulary most commonly used in everyday language and progressing to more complex and specific over time.

Why choose Lingvist

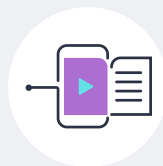

Use Lingvist at any time or place or on any device

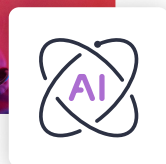

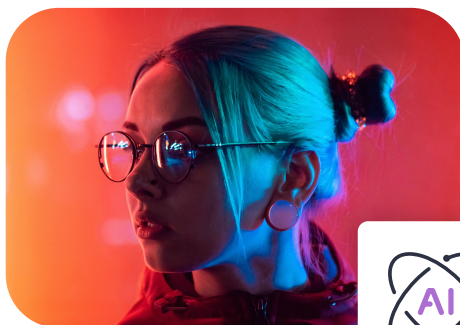

See progress with only 10-15 minutes a day

Access to 50+ language pairs

Learning statistics to track your team's progress

The science behind Lingvist

Lingvist teaches language using a spaced repetition algorithm, meaning the app adapts to each user individually. The words shown and their frequency are based on the learner's responses, with learning retention optimized by displaying the right words at the right time to increase long-term memory.

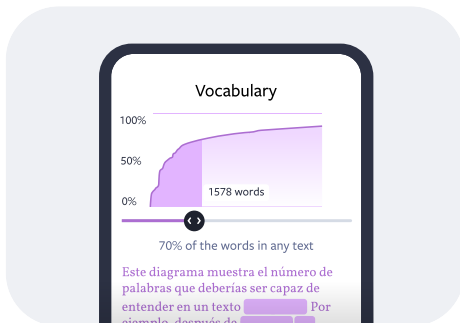

Learn a language faster than ever

Learning method

Lingvist's flashcard method is based on the **implicit learning method**, combining vocabulary, listening, pronunciation, writing, and grammar. Learning occurs implicitly, as users are constantly exposed to new vocabulary in real-life contexts, correct sentence structures, and proper pronunciation.

Why Lingvist works

Lingvist leverages AI technology to tailor language learning to each user. We use **statistical analysis** of large amounts of text that considers the **frequency** and **context** of words used in everyday language.

Your team will achieve faster progress by completing just **50 cards or studying for 10 minutes every day** with no distractions, no ads, and bite-sized lessons. Use Lingvist on any device, anywhere, at any time.

Why Lingvist for Business is different

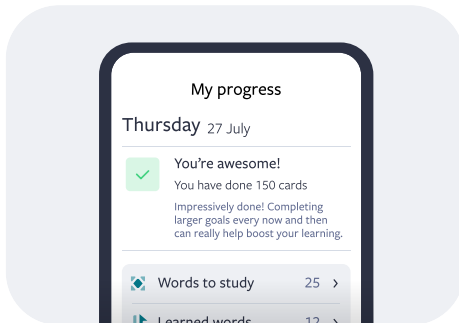

Personalized learning

The Lingvist experience is tailored to each learner right from the beginning. Complete beginner, intermediate, or advanced, our **placement test** positions every learner at the right level, so they can start learning the most relevant words immediately from a point that is challenging for them.

LINGVIST

Progress tracking and statistics

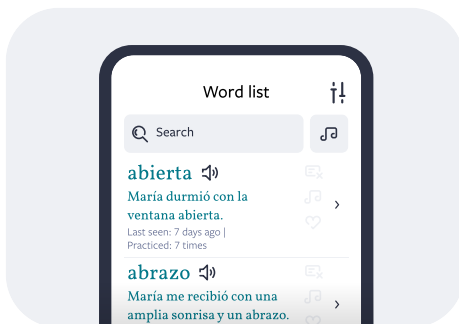

Every team member can follow their learning in detail with motivational **insights to help them visualize their language level, words mastered, and vocabulary to study**. As a company, you can track your team's progress through Lingvist Classroom.

Lingvist Decks

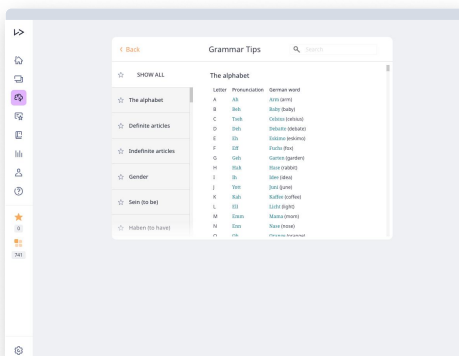

Learners can choose from different topics in order to **learn the vocabulary that is most important** to them. Topics include travel, food, medical terms, business, and many more.

**Available in selected courses.*

Word List

Find all the words in your course in one place, hear and see them in context, track how often you've practiced them, and add notes.

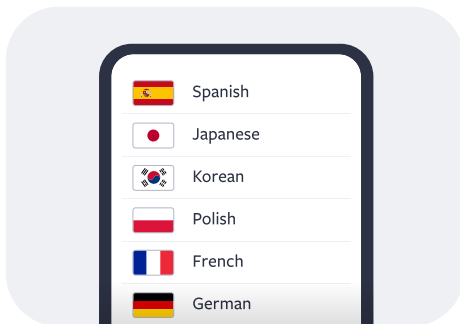

Other features

- **Voice input** – practice both your writing and your speaking skills
- **Grammar information** – deepen your knowledge of the target language beyond vocabulary with grammar tips and short explanations
- **Settings** – personalize your learning experience by setting daily goals, changing audio speed, or enforcing strict diacritics

A learning experience adapted to your team's needs

Custom Decks

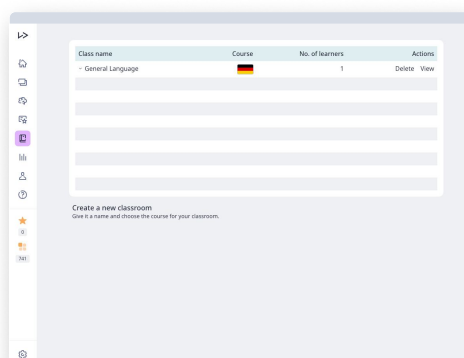

Custom Decks* is a feature that **turns any words or text you provide into a custom language course**. Your employees and partners can learn industry-specific vocabulary relevant to your line of business.

**Available in selected courses.*

Order your own custom decks

We can take your input along with that of our in-house AI and linguists to put together a custom deck based on your needs, allowing you to teach your employees work-related vocabulary in addition to the general language course.

- Contact us for a quote (anete@lingvist.io)

Classroom Mode

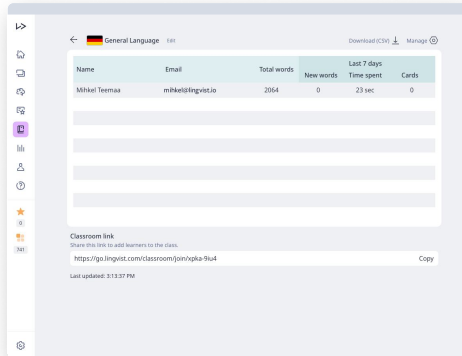

Create lessons with the Custom Decks* feature and use Classroom to **assign the lessons to employees** connected to Lingvist, or link and assign the general language course.

Managers have the option to create separate classrooms for different groups and assign any custom lesson to each classroom.

**Available in selected courses.*

LINGVIST

Share link

Managers can share a Classroom link with employees. Once the employee opens the link, managers will see the learning progress of all employees enrolled in the classroom.
